

WCC Board of Directors Candidates 2022

Ashley Mahaffey Tullius

Don H. Mahaffey Drilling Co.
Compton, CA

I took over Don H. Mahaffey Drilling Co. as the CEO and Owner in 2015. As a fourth-generation driller, I've grown up in foundation drilling.

I graduated from the University of Southern California

Marshall School of Business with a bachelor's degree in Business Administration concentrating on Real Estate Finance and Construction Management, with a minor in Urban Policy and Planning. I received a master's degree at Loyola Marymount University and my law degree at Loyola Law School. I worked full-time through law school. I am the license holder for Don H. Mahaffey Drilling Co., a licensed real estate broker, and licensed California attorney. I am a contract attorney for Gibbs, Giden, Locher, Turner, Senet & Wittbrodt LLP with a practice that focuses on construction and real estate. I am also an Adjunct Professor of Law at Loyola Law School where I teach Construction Law.

I work with my husband Matt, and we have two future drillers, Colin (3.5 years old) and Ava (18 months).

As a member of the Board of Directors I hope to participate in furthering the interests of our community. I will continue to participate in the CALTRANS/ADSC West Coast Chapter Task Force through its Substructure Committee Meetings and welcome additional roles within the ADSC West Coast Chapter. My desire to become a member of the Board of the Directors is to give back to the industry that has been part of my family's history for almost one hundred years. Thank you for your consideration.

Tait McCutchan

Malcolm Drilling Company
Kent, WA

I was born and raised in Washington State and currently reside in Maple Valley WA with my wife Tristan and two children, Melia (5 years) and Kai (4 years).

I attended Emporia State University in Emporia Kansas and went to work for Malcolm right out of college. This is my 21st year as an employee of Malcolm Drilling. I started out as a laborer in the field in the early 2000's and have worked my way up to Project Engineer, then Project Manager and most recently Senior Project Manager working out of our NW office. While I enjoy all aspects of the foundation drilling industry I mostly specialize in and focus on large diameter oscillated drilled shaft work.

I am dedicated to the drilling industry and have thoroughly enjoyed attending and participating in the West Coast Chapter Meetings for the last 14 years. It's been an honor to have the opportunity to serve as the Vice President of the West Coast Chapter for the last 3 years. I am looking forward to the opportunity, if re-elected, to serve on the Board of Directors for another term and to be part of furthering the objectives and goals of the ADSC.
