

# ADSC/WSDOT JOINT TRAINING CONSTRUCTIBILITY WORKSHOP

**April 20, 2023**

**Western Washington Operating Engineers**

**18701-120<sup>th</sup> Avenue N.E., Suite 101**

**Bothell, Washington 98011**

Your ADSC-WSDOT Task Force Committee invites you to the *14<sup>th</sup> Annual Joint Training Workshop*. Our goal is to develop a common understanding between designers, specifiers, constructors and inspectors in the design and construction of drilled shaft and anchored earth retention systems. The purpose of these workshops is to bring together WSDOT and Specialty Geotechnical Construction Industry personnel in a workshop forum for open communication and cooperation.

We are finding widespread use of the WSDOT Drilled Shaft and Earth Retention Specifications by other Public Agencies. We are inviting other agencies and consulting engineers to participate in this Workshop. This year's workshop will focus on the following topics:

- **Drilled Shaft Design, Construction, & Testing**
- **Anchored Earth Retention Testing**
- **Drilled Shaft & Anchored Earth Retention Case Studies**

From these seminars we develop implementation plans to address the identified areas in need of attention so that we can provide the end users economical & technically feasible Drilled Shaft foundation and Anchored Earth Retention systems.
