

WCC Board of Directors Candidates 2024

Jeff Long

Condon-Johnsons & Assoc.
Kent, WA

Jeff Long, a Safety Management Specialist, has been employed with Condon-Johnson & Associates since October of 2021, in addition, he has 31 years of experience as a Laborer, Operating Engineer, General Contractor, Safety Director, and Trainer / Consultant across the Pacific Northwest and 23-year member of IUOE, Local 302. He utilizes his extensive experience to engage and empower training participants. Authorized OSHA Outreach Instructor for Construction, General Industry and Disaster Site Worker. Currently ADSC West Coast Chapter Safety Committee Chairman Jeff has enjoyed the opportunity to instruct in a variety of areas including accident prevention, hazardous waste operations, high angle rescue, arc flash, construction safety, confined space entry and rescue, fall protection, personal protective equipment, rigging & signaling, forklift, flagger, pilot escort vehicle operation, emergency disaster preparedness, excavation & shoring and confined space entry and confined space rescue. Jeff also has a long history of instructing outside the construction industry that includes Emergency First Responder, Wilderness First Aid, First Aid and CPR, and Hunter's Education for the WA State Department of Fish and Game.

Aaron Thomas

Keller, N.A.
Phoenix, AZ

Aaron Thomas is currently an Area Manager for Keller North America's

Phoenix office with over 20 years of experience in geo-construction. I obtained my B.S. in Civil Engineering from Arizona State. My life outside of work revolves around my wife Tracy and my almost 7-year-old son. I have enjoyed ADSC meetings since I was a child, with fond memories of the annual meeting in Vail Colorado in 1989; so, I guess you could say I grew up around this business. I have worked on foundation projects in Arizona, California, Nevada, and New Mexico. I have currently been involved with Arizona DOT's update of their drilled shaft specification which should be released soon! I enjoy seeing all the technically challenging projects that all the chapter members work on, as well as sharing projects I have been involved with (even the lessons learned).

Jim Tippet

CZM, USA
Spokane, WA

I have been involved in the foundation drilling industry for over 20 years representing 3 different drill rig

manufacturers. During that time, I worked as an Engineer, Salesman, Sales Manager and CEO. I have been on the contractor side of the equation as well, managing a design build company who specialized in grain processing and storage facilities. Several of our projects included drilled foundation elements to support the structures. I also served on the National ADSC board for 6 years and have 5 years on local school boards. It would be an honor to serve the West Coast Chapter as a director.
