

WCC Board of Directors 2026 Candidates

Brad Hutton

Pacific Foundation
Vancouver, WA

Brad Hutton is a Project Manager and Estimator with **Pacific Foundation, Inc.**, where he has spent the past 11 years supporting complex deep foundation and geotechnical construction projects throughout the Pacific Northwest.

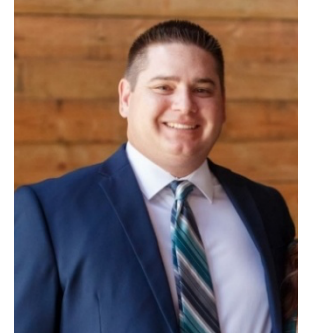

Brad brings over 19 years of hands-on geotechnical industry experience, having progressed from union laborer to field leadership and ultimately into project management. He entered the industry in 2007 as a union laborer in Vancouver, Washington, and went on to develop extensive field expertise with both TBH and Malcolm Drilling. During this time, he advanced through roles including drill operator, lead man, and foreman, gaining a deep, firsthand understanding of field operations, safety, and constructability.

At Pacific Foundation, Brad has continued this progression, advancing through field leadership roles into his current position as Project Manager and Estimator. His career path uniquely positions him to bridge field execution and project delivery, with a strong emphasis on constructability, risk management, and collaborative problem-solving between owners, engineers, and construction teams.

Brad is known for his practical, field-driven perspective and his commitment to delivering value through meticulous planning, clear communication, and disciplined execution. He brings a balanced understanding of both operational realities and project-level decision-making, making him a steady and effective contributor in leadership and advisory settings.

Nathan Tourtellotte

Malcolm Drilling Company
San Diego, CA

I grew up in the Los Angeles area and attended Cal Poly Pomona where I was involved in the student chapter of CalGeo, first by booking guest speakers and later serving as President.

After graduating with a B.S. in Civil Engineering, I was hired as a staff engineer at Geocon West where I worked on site explorations, boring logs, soils reports, and in the soils lab. There I also had the opportunity to work on construction sites as a grading inspector and concrete technician, where I was introduced to bridge work, tremie concrete and polymer supported drilled shafts.

Malcolm Drilling Company brought me on board 11 years ago, where I've worked in Southern California in positions ranging from project engineer to project manager on a variety of challenging projects and disciplines. I've had the unique opportunity to work with many outstanding crews from all over the West Coast and learn construction methods used in other areas.

I moved to San Diego a few years ago, where I now live with my lovely wife Cady (married last spring), and our two golden retrievers. In our free time we like to take our dogs to the beach and get our Jeep stuck exploring new trails.

I recently attended ADSC West Coast Chapter's January board meeting in Sacramento and enjoyed getting to know all the people I met there. I'm looking forward to getting to know the other members and supporting the chapter however I can be of service.
